

Since 1997, we've been factory authorized representatives and installers for Kewaunee Scientific, Inc., the second largest U.S. manufacturer of furniture for laboratories and technical workspace. Kewaunee's Technical Furniture Division (as opposed to its Laboratory Division) is focused on the design and manufacture of the industry's highest quality modular, flexible furniture for tech/lab workspace.

Kewaunee has been an industry leader since 1906. They are publicly traded on the NASDAQ exchange (KEQU). Kewaunee's website is: www.kewaunee.com. Click on our 'International' link on our website for a summary of Kewaunee's international locations.

Our focus and expertise is workspace solutions for technology. We work closely with Kewaunee, along with a select group of other manufacturers, to provide complete tech/lab workplace solutions, with a strong emphasis on flexible modular designs, of high quality and value, backed by established reputations and extended warranties.

Why flexibility & modularity? The technology workplace can be especially dynamic driven by rapid changes in products, procedures and workflows. As a result, the ability to adjust the configuration of workstations, lab benches, etc. can be critical to success on many levels: productivity, performance, return on investment, ease of use, ergonomics, etc.

We know that when you contact us, your tech workspace need may not be fully defined...so:

- We will take the time to work with you to specify the optimal product/service solution.**
- We'll provide detailed product specifications and even sample layout drawings, when they're appropriate for your project.**
- We'll promptly provide a comprehensive quote that fully explains what you're buying. (We believe in 'no surprises', except for how pleased you'll be with what's delivered)**
- After receipt of order, we'll promptly provide you with an order confirmation, give you an accurate delivery date, and regularly advise you of order and shipping status.**
- When installation is specified, we'll have a talented, experienced team there to complete the project to your total satisfaction.**
- You'll find that we're exceptionally helpful & knowledgeable. We make the process smooth and informative...from your original concept to turnkey installation to our attentive on-going support.**
