

FURNITURE SOLUTIONS FOR TECHNICAL ENVIRONMENTS

EVOLUTION FOR LANs *efw*

Color Options

Standard paint finishes for Evolution for LANs are Sand Tan and Dove Gray. Other colors are available upon request. Accent strips are available in Dove Gray, Almond, Black, Wineberry, Midori, Dresden Blue, Brittany Blue, and Hollyberry. Worksurfaces are either Dove Gray or Almond.

Flexibility for a changing workplace

The winds of change are constant in today's technical environment. Bottom line concerns walk a thin line between the here and now of today and the uncertainty of tomorrow. Kewaunee Scientific Corporation can help you gauge those winds by offering flexible furniture solutions.

Evolution for LANs is designed for local area network computer equipment and accessories storage. Each modular workstation can accommodate monitors, CPUs, UPSs, back-up storage devices, modems, printers, file servers, keyboards, documentation and reference manuals. Equipment can be organized on a variety of shelves and mobile or fixed storage units.

Evolution for LANs' multiple configuration capabilities crafts individual work problems into workable solutions for today and tomorrow.

Based on the Evolution product line, "Evolution for LANs" is designed to support the equipment in the local area network environment. Starter units and add-on units in various sizes, as well as multiple optional accessories, provide the ability to build customized configurations that precisely meet customer needs. Optional shelves support up to 500 lbs. and mobile floor shelves support up to 1,500 lbs. Mobile units are available in widths up to 72". Vertical wire management is standard on every unit. Options include horizontal wire management, power distribution units, storage units and keyboard trays.

If mobility is a requirement then Evolution for LANs is the solution.

Mobile column assemblies include heavy duty casters and an extended base that provides the stability you require. Select from 7 widths of column assemblies then add just the shelves, worksurfaces, and accessories you require.

Mobile units are flexible and can be reconfigured as your requirements change. Mobile pedestals in 5 different drawer configurations fulfill your mobile storage needs.

Modular and flexible

Evolution for LANs is modular, flexible, and easy to order. Column assemblies are the structural elements that form the framework for all options and accessories. Unlike other products, Evolution for LANs gives you the ability to select the width and configuration that best meets your needs. Add-on column assemblies can be ordered with your starter column assembly or added later without disrupting your installation. Simply add a mounting bracket to an existing starter column (left or right side), attach the structural modesty panel and the new column and you are ready to add shelves, worksurfaces and other accessories.

Ordering is easy

Select the starter and add-on column assemblies first. Shelves, worksurfaces and other accessories must then be selected in widths that match your column assembly widths. Keyboard trays are available to mount under both shelves and worksurfaces. Power distribution bars mount between columns and must be specified in widths that match the column assemblies. Drawers may be specified in conjunction with worksurfaces. Each modular set of drawers requires a drawer mounting bracket to facilitate attachment to the underside of the worksurface. Locks are standard on all drawers and overhead storage units.

COLUMN ASSEMBLIES

Starter Column Assemblies

Starter Column Assemblies include (2) 76"H supporting columns with bases, 76"H vertical cable management, and modesty panel for structural integrity.

Add-on Column Assemblies

Add-on Column Assemblies include (1) 76"H supporting columns with bases, 76"H vertical cable management, and modesty panel for structural integrity.

Mobile Column Assemblies

Mobile Column Assemblies include (2) 76"H supporting columns with bases, 76"H vertical cable management, modesty panel for structural integrity, and heavy duty locking casters.
